

~18th January 1999~

Good evening. (*General welcomes*)

Before I speak with you this time, I would say this to you all: That next time, there will be someone who will answer your questions on the arrival of the new human being.

Les: Thank you that will be interesting.

I understand your doubts, but wait for what is said to you, before you question further. It will be given to you in understandable terms, in order that you understand fully, the workings of life.

Les: We shall certainly look forward to that.

This brings me to what I wish to say to you this time, my dear friends. We have spoken much on this your planet, the evolution of this planet and many others within the universe and the cosmos. What you perhaps do not know and understand is this: That each inhabited planet is overseen by those of us, who have been guided to oversee the evolution of these planets. There is I believe amongst you all, a vision of one guidance for all.

Les: Yes, I believe you would be right in that.

Of course, I must emphasise at this point, that there is only one *Creative Force*, from which we all come. But I do not think you understand that many planets are guided individually, by many principles and forces.

Les: I had suspected that that might be so, speaking personally, because I have often wondered how angels came to be considered as helpers in this world, if it were not for people—I say ‘people’ reservedly—if it were not for *entities*, having been given control, just as you have told us. Various entities are given control over the flora and fauna of this planet.

If I may say, in each individual planet’s control, if I may use the word, perhaps you are familiar with, there is ‘*hierarchy*,’ from the lowest to the highest, which governs each planet. But what I wish to tell you, is that the over-ruling guidance, comes from a number of beings — from great, shall we say ‘*consciousness*,’ higher consciousness, than you would perhaps expect.

Les: I see, so it is a chain of command, as it were?

Yes. These beings would not be known to you, in any form at all, because they guide and oversee the evolution of each planet in guidance from that higher force, from which they take command.

Les: Yes, that’s very, very interesting for me and I’m sure it is to the others and it does confirm what I have long thought, to be the case.

This thinking is disputed by many, who can only see one overriding guidance. You must understand my dear friends that the evolution of different planets, are at differing stages.

Les: Yes, of course.

So guidance must come from the higher consciousness of those, who are able to help and guide.

Les: Yes, and that doesn’t surprise me at all, what you say. Is everybody clear on that, the chain of command from the Creator — any queries?

Sarah: So they know what we are supposed to be doing, how the planet is supposed to evolve?

Les: They would be aware of it, they have that knowledge, I’m right, aren’t I Salumet?

Yes, yes, the evolution of each planet is known, but as you also have come to know, individuals upon each planet, can affect many changes, with the power of their *Thought*. But what I would like you to fully understand, is that many of us who come to help, have chosen this pathway, in order that the greater scheme of life should evolve in each planet, in each individual form, and to cosmically follow the right pathway. The state of being that many of your earthly masters feel, comes from that consciousness, which individually controls the planet and not from that greater source of consciousness, as you may have assumed. Am I making sense to you, my dear friends?

Les: Yes, you are to me. Does everybody else fully understand that? (*General affirmations*) Let us say that responsibility is devolved, just as it is on Earth, in the human chain, everybody clear?

(*General affirmations*) And to emphasise that, you’ve only got to go through your knowledge of history, to recognise that many people have been aware of underlying influences, right from the earliest time of history, but have not been able fully to describe them accurately. The description has just been given to us. Am I right in that Salumet?

I believe your words to be good and correct. I will not go too deeply this time, but I wanted you to have the understanding that there are many forms of consciousness, of which you could not be aware at this time. So I will say to you my dear friends, take these words I have given to you, think upon them deeply, and when

we continue, I hope there are some questions for me that I can help you with. You have to try to begin to understand that there exist many forces, that as until now, you may not be aware of, but which I hope I can bring to you, to form a fuller picture of your life and usefulness upon this planet.

Les: Good, we look forward to hearing it.

Do you agree that you have enough to think upon this time?

Les: Well, I would love you to go on with your explanations, if you can do that and I'm sure we would all like that, wouldn't we? (*General agreement*)

I will go a little further then.

Les: Thank you very much.

When we have spoken in time past, of visitors to this planet, I have told you, that that indeed exists and I believe you now fully accept that many forms of life exist throughout the cosmos.

(*Yes—*)

You must now accept that these 'space travellers,' as you call them, are also governed by higher consciousness, from their own worlds. You have to now accept that they too belong—and I will use the words of my dear friend, they belong to a chain of command. So what visitors you have to this planet, have already been guided here. As we speak about these beings—and I will tell you that these beings of consciousness, have never belonged to any individual planets. I will now tell you there have been visitors to this planet for many, many hundreds and hundreds of years.

Les: Yes, that doesn't surprise me at all.

So, what you think of as a new situation is not. We have within many galaxies, beings of intelligence who far outweigh many of your so-called 'masters' upon this Earth.

Les: Yes I can well believe that!

So, you see that whatever you feel this Earth planet is meant to be doing, it is fully controlled and helped by many forms of consciousness, within many galaxies. So, do you begin to understand, how small a part you play, in the scheme of existence?

Les: Yes we do. And what you say is quite logical to me, because you have explained many times, that our soul is of many parts. To me, it is quite understandable that if we are reflections of part of the Great Creator, then the Great Creator must itself be a soul of many parts and those parts are

the consciousnesses, who are responsible for the evolution of the planets and for the carrying out, of the wishes of the soul, The Creator. Does that sound too complicated?

I think perhaps, to the others, but you my friend, I know think deeply. You have my friend, attained much knowledge in other times and which is innate within you. But I feel, with the others, they must think upon each point more thoroughly, in order for their understanding to come. The Great Creative Force is not known to me in any form, but I will say this to you: (*Voice intensity increases*) **You are part of the Great Creative Force, therefore you ARE the Great Creative Force. You are that element, which comes from the release of consciousness, from the Great Force. There are many forces and many principles — many forms of consciousness, which emanate and are created into human form, into many planets, into many forms of existence — into all forms of life. You cannot describe that force, which has been created, because I do not know of any consciousness, which could give description to it. It is something that all consciousness works towards, but in so doing, it opens more horizons of thinking.**

Les: Yes, we have come to accept that too. That the more we question, the more we learn, the more there is to learn.

(*Voice becoming very faint*) **But in learning you are being, in being, you are absorbed, In being absorbed, you become part of an aspect, in being part of an aspect, you become part of the Whole. I could continue, continue, in the many steps of all Creation, but I do not wish at this time to confuse you.**

Les: No, we do understand that and we thank you for your consideration, but I think my colleagues will accept that throughout history, each individual attempt, has been made to understand, what you have been telling us tonight. Each individual existence has its own interpretation of what it is trying to understand. The Egyptians in the 'Book of the Dead' and the transfer of physical objects in their graves — the belief that one is taken across the River Styx, by

an oarsman and the other day I was watching a programme on television, where a 1600 year old corpse was found in a lead coffin and to the astonishment of those who found it, it had a coin in its hand, to pay for its passage into the next world. So everybody throughout history has been trying to understand, but never has been fortunate enough, to have the explanations that you are now giving us. And for this, we are extremely grateful.

But, my dear friends, does it not show you that this Earth planet, is reaching a point in its own evolution, where knowledge is being given around your world, in order that you can evolve, in the same way that many, many others have?

Les: Yes it's true.

You are very young, in as much as knowledge goes. You know very little in the way of existence. But your time is coming, and that is why there has in your time, come the emergence of others, to show themselves to the human beings of this planet, in order that you understand that much greater knowledge is known by others, throughout your universe.

Les: Yes. Well we consider ourselves fortunate that we are having that information given to us now.

You must analyse it for yourselves. Your understanding even within this room, is individualised by your own knowledge, your own development and your own acceptance of what is coming.

Les: Yes. I think I can say we all look forward to the acceptance of what is coming. I don't think any of us would have any hesitation in accepting it, since we have learned so much from you. Is there anybody here, who thinks that they are *not* able to accept what is coming to us, in the way of knowledge? Are there any restrictions in anybody's minds, to the acceptance? *(General agreement)* Everybody's quite happy about that, it is important? So everybody is quite happy that there will be no mental restrictions, placed upon an acceptance of knowledge that is going to be brought to us. If you have any doubts, I would remind you, if I may, of what I have said a number of times, in the course of the years, that I was told many years ago, when someone said, 'Why can't you give us proof?' And the answer was, if you have faith, you will receive the proof. Hasn't that been born out over the time we have been together?

(General agreement) So I would suggest that if you keep hold of that, then your acceptance will not be difficult, however strange the truth may seem. Is that understandable to everybody?

(General affirmations) Good.

I will say only this to you this time, before I leave you: I when I first came to you, begged for your patience, in what I had to bring you. We have reached a point my dear friends, when we can give you more, but what I wish to say to you all is this: That whatever your fears, your doubt may be, each one of you here has been chosen for some mission in your life. It may not be completely clear to you at this time. I know in past times, some of you have felt that your lives have been insignificant. I am here to tell you that these thoughts must be banished from your minds, in order that each one of you can go forward to complete the tasks that you have chosen. On these words my friends, I leave you with the love that enfolds you all, at all times.

Les: Thank you very much and God bless you.
