

~23rd August 1999~

Good evening. (*General welcomes*)

I feel much love this time from each one of you. For this I thank you and reassure you that conditions such as these enable me to work more easily with you. Before I speak with you this time my dear friends, I would like if I may, to ask you a question if that is permissible? (*Yes.*) I wish to say to you, and it matters not which one of you chooses to reply, but I would say to you all, what is your perception of this your planet, this earthly world? What is your own perception of it? Would one of you like to answer please?

Sallie: I think it has the potential of being the most wonderful place one could imagine.

I accept that—and it is a clever answer, which indicates to me that your consciousness is more raised than you yourself accept my dear. This world you live in is but very young in its existence as you know, but what differs from many other planets is that you people as human beings have so much influence over it.

Lilian: More than if we were on another planet, more than other people on other planets?

Because all what you are and the planet to which you belong, there *is* a slight difference. This I wish to try to explain a little to you this time. (*Thank you.*) You know my dear friends that as far as awareness—consciousness of that Divine Intelligence to which we all belong, the human race in this world is very young. I have told you, there are Masters who walk amongst you, but they are few in number; mainly the human being upon this planet is young in consciousness. But what I wish to explain to you this time is that what you perceive this planet to be is what this planet becomes. Do you understand those words, firstly? (*General agreement*) You do?

Lilian: We have to take care of it.

It has a deeper meaning than being responsible for the planet. You human beings upon this planet were bestowed with your own free wills; this you know is essential for your living here. Therefore what you perceive is what becomes your reality. Therefore you might say if you accept this aspect of teaching that your world is in fact the conclusion of what each and every one of you think. Therefore you might say the world as you know it is an illusion. Do you

understand what I say to you? If you do not, my dear friends, let us stop and discuss it now.

Lilain: Does everyone understand? (*General agreement*)

Because you are spirit, what you perceive by your mind is in fact illusion within this world; because of your free will you have and use daily many thoughts, which are in fact not reality but illusion. Therefore I say to you my dear friends you are living now within a world of illusion that can be altered, that can be changed to your will. Therefore we come to the statement made by the lady: This planet has the potential to be what you human beings call '*heaven upon earth.*' Can you accept this statement? (*General agreement*) I don't wish you to accept it lightly, because the meaning is deeper than you would at first accept. (*Yes.*) So we are in agreement; therefore if this world based on illusion of your own thinking—and again I speak of mankind generally—where do you go from here? Can you answer this, please? Do you know?

Lilian: No, I don't think any of us could answer that, can we?

Sallie: I know what I *think*. I think it is a question of raising awareness, (*Yes.*) and as awareness is raised then the consciousness of more people becomes affected, (*Yes.*) until enough of us are thinking along similar lines so actually affect a change in the illusion.

Yes! This lady speaks wise words. My dear you have grown much in past times, you are growing, growing, growing. She is right in what she says that because each one of you, each human being upon this planet is *Spirit*, you have the potential to become '*one.*' In becoming '*one*' you would be a planet transformed. If consciousness was raised to join together as one, then indeed you would be in heaven on earth. You follow my words so far? (*General agreement*) Therefore I say to you—and I repeat words I have said to you but now perhaps the words will have more meaning for you—that to seek that divinity which each one of you *ARE*, you must go within, raise that consciousness so that illusion is reality, that you have the *means* my dear friends, to change all that is in, around and about you. Do you understand what I say? (*General agreement*) Yes, what would the lady like to say, please?

Sallie: I suppose it's something I have got to learn to do better, but I have found that it's dangerous for me, that I alienate people when I speak openly about what I think and sometimes I think is better for me not to say anything at all, but that doesn't change anything though, does it? I suppose part of the price is to be alienated—it's part of what you're here to do.

I would say to you my dear friend that this is happening because you are not yet aware of the reactions of your fellow man. You are being attracted to people not yet ready to receive. But do not be concerned, because with their freewill that is their right to reject what you say. But you should not feel alienated from them. Know that you have spoken words of truth and be happy for them. You will come to recognize the times, the situations, the happenings around your life when it is suitable for you to speak these words of truth. Too many times fellow human beings deny the right to speak what they know to be true; that I would say is not the correct path to take. So therefore I say to you my dear friend, do not chide yourself, do not be upset by the reactions of your fellow man. If you have spoken words of truth with kindness and with the correct nature of words, then you can only have done good, not only to yourself, because remember all things are retained by *Spirit*, and although it may seem that your fellow man has rejected, I would say to you this: That they have taken in, in *Spirit* form, that knowledge which you have passed to them. Do you understand?

Sallie: Yes I believe we all hear things at different times and there is a right time for us to make it part of us. **(Yes.)** But part of me—it's the physical part of me—I end up I think with people becoming afraid of me.

No, no, no, no—no my dear friend that is not so. The problem lies not within you, but within the receivers. You must not allow yourselves to feel—you must protect yourself from negativity from others. You know within your own hearts that any words spoken in truth can only be good. Don't be afraid; what have I taught you my dear friends, about fear? (Yes.) Fear will always hold you back, but remember, you are divine beings nevertheless but each one of course is on a level of consciousness of their own doing, but when this world of yours becomes raised and each one of you becomes more aware of that Divine Consciousness, that is

what you should strive to do for not only yourselves, but this world of illusion. I want you my dear friends to think about my words this time, to see this world of yours in the manner which I have described. Try to find your place within this planet, try to seek within you what it is you need to do, what it is you need to change; not with the world but within yourselves. Only then is there the possibility that each one in their raised consciousness will become the greater and all expanding *one* consciousness. I will leave you with those words my friends, because I do not want to overload your thinking. We will return at another time and I will ask you to put to me any questions you may have. But I hope that my words this time have given you a different aspect of living upon this planet.

Lilian: Yes it certainly has. *(General thanks)*

Sallie: It's very reassuring to hear you talk like that. I think sometimes you spend so much time with people who are not ready to accept anything like that, that you almost begin to lose faith in yourself and to hear you reiterating those things again, it does help.

Yes this is always what I will strive to do, because I know you humans have many frailties; you forget easily, if I may say so kindly. Therefore it is important that as we grow in knowledge that I gently remind you of words I have used previously, in order that you may come to see the wider scope of life. It is important for your growth I feel that we gradually incorporate each step slowly, that one picture grows to be much larger in your understanding, do you agree? *(General agreement + Thanks)* And before I leave you to be used in other ways, I would like to take this opportunity my dear friends, to also again remind you, because we know upon your planet there has been much talk again of devastation. I wish to remind you that this planet will continue. Mankind has reached the stage of knowledge where it *can* be changed and I have said to you, *it will not be destroyed*.

Lilian: That's comforting, because it is a beautiful place.

It is a beautiful place only if you allow it to be. *(General agreement)* Now I will withdraw from you this time. Again I ask for each one of you that you think about my words.

Lilian: Yes, we shall listen to them again on the recording.

Thank you. Now I ask that each one opens up to those influences which surround you at this time. After all it is part of our work that each one of you be helped to unfold in your own individual ways, that as we go forward each one of you feels your own consciousness being raised. So my dear friends, allow that love and all within you to open up to whatever surrounds you now. (General thanks)
