

~30th April 2001~

Good evening. (*general welcomes*)

I said last time that we would speak about new truth, but I give welcome to the gentleman who comes to us this time. (*John from Basingstoke Gazette newspaper who wrote article on George's book*) And I feel it would be best if we had an evening of discussion and questions in order that he may see what truth is about.

Lilian: That's a good idea—he's a little apprehensive.

We welcome all who seek truth. I would say to you my dear friends, that your thoughts this time have reached me. I hope that those of you who have been seeking answers will find them soon. Let us begin this time by putting a question to you all. What would you suppose that—what is Cosmic Law? We hear so often from your world that question. So my dear friends, I put it back to you.

Mark: To me it seems like it is the backbone to everything—the thing that holds everything together, but I can't be very precise about it.

Sara: Is it the laws by which man can live happily, effectively and progressively in this world—well, not just in this world, they originate from your world—the laws by which we try to live?

Yes. You are told so often by those from my world, that you should abide by Cosmic Law, that Cosmic Law is perfect, and of course, it is. But I wish to say to you this time my dear friends, and as always, my words are simple to you: Cosmic Law is just one thing, it is a balance of all things—of light of darkness, of good of evil. All aspects of living must maintain this balance, if you are to live your lives in this physical condition. Therefore I would say to you:

Cosmic Law is balance. Would you agree?

(Yes.) I would wish you my dear friends to think of this truth, because that is what it is, to think simply and you will abide by those laws so much more easily in your lives. Do we have questions my dear friends?

George: Would it be true to say that Cosmic Law arises from, or is intimately bound up with the process of evolution? It would embrace the physical laws of the Universe, but I think these physical laws would only be a small part of Cosmic Law. Cosmic Law would embrace the wider spiritual evolution (Yes.) with its karmic process and whatever other processes are

involved in evolution of spirit. Is there sense in that or am I talking rubbish?

My dear friend I have not found you to speak so far what you would term 'rubbish'. (*giggles*) But of course in your learning, you need to take full facts, before you can come to the correct answer and this I would say you do very well. You cannot have a Cosmic Law, which does not allow the evolutionary process of all things physical; of course it is bound together. Cosmic Law governs all, not only this planet, but the words themselves tell you that Cosmic Law includes *all*, all that has been created. Therefore you have to allow that all things physical, physical evolution not only of *mankind*, but of the *planet*, has to be included within the Cosmic Law. So of course, your assumption is quite correct. Cosmic Law not only allows the evolution of mankind, of nature within this planet, but of all the planets within this Universe and the many others which exist. The whole of the Cosmos has to be within that greater Cosmic Law. There cannot be any separation. Do you understand? (*affirmations*) Cosmic Law has to be perfection, otherwise what point would there be to it? It would not make sense, would it? (No.) Perhaps I would say to you my dear friends this: That if you can see yourselves as you *are*, as you exist at this moment in time—the *physical being*—you are a whole Cosmic Law within that physical being, because you have the balance of good and bad, light and dark, all within the physical being. You are, as your scientists have already discovered, you are that *microcosm* of the *macrocosm*. Do you understand? (*affirmations*) You are the tiny part of the whole, but that tiny part *can be perfection*. It is not easy to become perfection, and certainly not within *one lifetime*, but you have the energy and the power to become so. Do you understand my dear friends? Am I making this simple enough for you to understand? (*affirmations*) Do we have any questions?

Jan: Well, my question has just been answered, because I was going to talk about the good and the bad and the light and the darkness in our physical anyway, and that certainly answers my question.

Would the gentleman (*John*) like to ask some questions, because he is seeking and I do not wish to be too complicated in what we discuss this time.

John: I would rather listen just for the time being, if that's alright.

Let us continue then my dear friends with any questions that you would like me to answer for you.

George: I think our perception comes into this, as well. I was reading recently of a more Catholic view that God punishes. This came out in 1917, when Mary appeared in a vision at Fatima. She indicated that we would be bringing World War II upon ourselves if we did not change. The Catholic view of this was that God would punish us for our wayward ways, but I think the more mature view is that we are directing our own evolution and we were evolving into a condition of WWII and directing that ourselves. So our perception is such, in the simple sense that God is punishing, but in the more mature sense we are leading our own evolution. Is that a matter of perception would you say?

Yes, well we must return to more simple things my dear friend. I have already spoken extensively and for your own understanding, we will use the word 'God', but you know that I prefer to use the more visionary words if you like, like *Universal Love*; that is more apt than the word that you use and know as *God*. You are restricted by this Earth's religions. Each has its own way to what you call God. We have discussed this many times. You also know my dear friends, that mankind has been given what we call freewill and mankind has to be responsible for all that happens on this planet. You are the keepers of this planet. Therefore it is necessary for me to say that that responsibility has been much neglected in many of your past years. Mankind is responsible for creating much negativity within this planet and mankind must take responsibility for it. I have told you when first I came to you, that the time had come for the truth to be known, that the Spirit of mankind had to be touched in order for this planet to return to what it was meant to be. Man has abused knowledge, man has abused energies given to him, scientists have ignored advice and help that we have tried to give. Therefore it was imperative that many of us from our world, came to this planet to *touch* the Spirit, because *only when the Spirit is touched will mankind realise what it is that he has to do*. You have the freewill to accept or reject truth.

Jan: But Salumet, there will always be those who accept and those who reject, because that is the lightness and the darkness, so that will always exist.

Of course, that is the purpose. Lightness will always overcome the darkness. But as I have told you, they are but reflections of each other. I do not wish you to see lightness and darkness as opposites. They are in your *physical* thinking, but spiritually you must see the wider scheme of things.

Sara: So, the crises that we have are manmade, but they are also part of our evolution. **(Yes.)** We learn from the darkness that we create, and it's on-going.

Of course. You cannot have one without the other. They are but energy and they are but reflections of each other, but because of mankind's freewill, he has the power to accept or reject. Do you understand what I am saying to you? (*affirmations*)

Lilian: So out of the disasters, as we call them, a lot of goodness comes. We can see that.

Yes. Only as you grow, only as you evolve do you see this. But I must return to the question put by the gentleman, because he speaks of *perception*. May I say to you dear friend, perception belongs to the physical brain, not to the spiritual mind, so you must be careful when you speak about perception. When the Spirit is touched, the mind comes forth and understanding is greater. You must not confuse intellect with intuition, there is a difference.

George: Yes. Going back to that event in Fatima in 1917, that was a time when I think the Spirit was very much touched.

Yes, that was the reason for the visitation, that it was needed at that time to make people *understand* what was happening.

George: It seems to have been a wonderful demonstration and it's a pity that mankind didn't heed the message that was delivered then more strongly, but on reading about it, the Spirit certainly seems to have been touched, **(Yes.)** the Spirit of many.

The Spirit of many was touched indeed my dear friend, but not enough. It was indeed a time of great darkness on your planet, but I believe you would agree that since then, much has happened, that mankind has opened up spiritually and emotionally and mankind in this

time is now beginning to realise what his plan upon this planet is.

George: Yes, and even then at that time, Mary indicated that it was important that Russia move away from atheist communism, **(Yes.)** which has since happened. It seems to have been a very important message for the last century.

There is upliftment, there is knowledge given to many in this world, but it is a slow process. You must remember that *time* as you know it, means little to us in our world. As we see it, much progress is being made. Mankind *will not* destroy himself, because at last truth is becoming known. (Thank you—)

Jan: Salumet, something I learned the other day—I separate the two rightly or wrongly—evolution of the Spirit and evolution of the planet, are two separate issues to my mind. What I learned the other day was, I'd always been a great believer in mankind having a part to play in the destruction of this planet, but I learned that the evolution of this planet is an revolving thing, as evolution implies, that every so many million years, it goes through the same process to rejuvenate itself and our part in that at this moment must be so minute—I don't really know what I'm saying—

No, I understand your words my dear friend. Why should it surprise you? Mind consciousness—you imagine every human being upon this planet, you imagine the power of the energy of each individual as a force of energy—has much impact upon the evolution of this planet. Of course there is separation of planetary evolution and human evolution, but the two are intertwined, you cannot separate them. Although they go along a separate evolutionary path, you cannot separate the two, they belong together. Do you understand?

Jan: I feel that I want to say yes.

But you cannot.

Jan: No, I wouldn't be very truthful if I said yes.

I would not want you to be untruthful. Let us try to clarify it for you. What do you not understand?

Jan: Well, the perception that I have had, my mind or brain over the past 10 years regarding the destruction of this planet with global warming, etc. has now been completely quashed from what I heard a number of scientists say. What is happening for example on glaciers, happened one million years ago almost to the day

and it's following its normal cycle and that we haven't had anything to do with that at all. And it got me thinking, that although we should take responsibility for that, in one way it is not our responsibility.

Yes, but it *is* your responsibility.

Jan: I know we can't shut our minds off to it spiritually and just ignore it, **(Yes.)** but at the same time, if it were to destroy mankind—I don't know, in millions of years to come, there is a possibility that life will balance itself out again and life will start again on this planet.

Yes, we have discussed this. I do not believe you were here when we discussed the evolution of the planet and what mankind was up to, but let me say briefly to you my dear friend, again you are using the brain to make, what the gentleman calls *perceptions*. What you must do is look from a *spiritual* aspect. You do have the power—mankind has the power upon this planet to change many aspects, but it cannot change the overall Law of the Cosmos.

Jan: I think that's what I'm getting at Salumet. I've come back to an initial—you see where I am coming from?

Yes, I do my dear friend and I am trying to clarify it for you. Mankind can change many things on this planet, but he is not totally responsible, because the planet has its own evolution. But you have to understand that they are entwined, you cannot separate them. I know this is difficult to understand, but you must try to look at it from a spiritual standpoint, otherwise it becomes confused. This is something we will return to at another time and I will go into it in more depth. It is a difficult subject, because you do not have the ability to understand. You cannot until you evolve yourself, you cannot see the wider picture. This is always the problem when we bring knowledge to you from our world.

Jan: We are always looking for a scientific answer!

Unfortunately—and I mean no disrespect to great minds upon this Earth, but scientists are changing their views slowly. You have two schools of thought: the traditional scientists and the scientists of what we would call this '*new age*'—new age of knowledge and truth—who are beginning to understand that the physical, the planet, the Universe, is not what it was

initially thought to be; that without the knowledge of Spirit, mankind cannot go forward. As I have told you on many previous occasions, mankind has lost so much, mankind for many, many thousands of years upon this planet, has taken backward steps.

Jan: Spiritually?

Spiritually. Always I speak spiritually. I should remind you, but I expect you to understand by now, but I forget sometimes that the human thinking is apt to forget so quickly. Always, always, as I have told you, when you have any kind of problem, when you are confused about any issue, sit quietly and let the Spirit come forward and always you will find that deeper answer. We cannot give you all of the answers, because you are *not* ready for it. We can only go slowly, use simple words, in order that you understand what we are trying to give to you, in order that you can go forward and give this to other people. You know this is our objective, that you are emissaries of Spirit, that without your help, it would be much more difficult—and always I thank you for this.

Sara: Can I just add something to that? So although the planet is evolving physically, we as human beings have to learn to love and attune ourselves to the planet as it evolves and perhaps that's where the two meet. It's not enough to scientifically analyse what is happening, we have to love it at the same time, to love the planet and that is what is missing.

Yes, love—love is *all things*—not only the planet, but all that exists within it. We have spoken about Nature Spirits, we have spoken about all aspects of life upon this planet. You have to become and recognise each aspect, not only of the vegetation, but *all* aspects: the *land itself*, the *ground*, the *Earth*, the *sea*—*all* things upon the planet—you have to become attuned to them to truly understand what it is about. You are quite correct.

Sara: So the big gap that we have at the moment is between the *analysis* and the *love*. We need to have the love, the genuine love of the planet. **Yes, you need to give spiritual love. Do not confuse spiritual love with physical love. Always think spiritually and you will have the finer answer to your questions. I know I speak so often of this my dear friends, but it is important that you look with spiritual eyes rather than physical. Do we have more questions?**

John: I was interested in the evolution that we were talking about earlier. Is evolution just down to natural selection, or is there more to it than that, because it seems to me that natural selections can't account for the vast array of diversity that we have around us. Is it guided in some way, or is it really just down to natural selection?

No, you need to understand my dear friend and I know you are new to these many truths, but there are *many* aspects of guidance outside of this planet. When you realise the vastness of the Universe and let us take this one Universe that you are aware of and the vastness of all the other universes that exist, how can it be just natural selection on one small planet? There is guidance from without, that is for sure, that is truth, but it is within the plan of the whole Cosmos. It is not a selected planet. It is a planet of learning for human beings, but there are many such planets within the Universe. This is something you would not be aware of. But there *has to be* guidance, there *has to be* perfect law. Therefore I would say to you, you are correct, it is not down to natural selection. Do you understand?

John: Yes, thank you.

Mark: John was talking in the car that he looked up on the internet and found a reference to Salumet talking in America. It was spiritual—**When first I came to you my dear friends, I did say that what was given to you would be reiterated all over your world by many teachers.** (Yes.) I cannot comment upon the name, I am not aware at this moment in time, but I would say to you, names mean very little. When first I came to you, I did say that I was a conglomerate of beings, therefore single adaptations of names matter not. If the truth is being given in another land, then that is what we are trying to achieve. Remember also my dear friends—and I will not enter into this at this time—that we can be in many places at the same time. Do you understand? (Yes.) **But my dear friends, I will thank you once more for your questions. I hope I have helped you in your understanding and I look forward to our next gathering and know always that I am close to you and those who are there to guide and uplift you stand close by you.** (*thanks and farewells*)
