

## **SALUMET & PLANET AERAH**

25<sup>th</sup> March 2013.

George: Good evening Salumet, welcome to you.

**Good evening.**

All: Good evening.

**I am happy to join with you once more.**

Lilian: You're very welcome.

Sarah: It's good to have you back again.

**I have to say to you this time my dear friends, I am aware that sometimes you feel that I am responsible for all things that happen within this group. I want to say to you I am involved a great deal with what occurs here, but not everything. When I leave you, I return to where I belong, in order that I can continue with my own growth. Therefore, I just want you to understand that there are *many* people who wish to join you on these evenings that have nothing to do with *me*. Although I, of course am aware of what happens, it is not always through my *helping* them. You understand?**

*General affirmations*

George: Yes—we had an interesting visitor last week, named Joshua, who took up our prior conversation (**yes**). That was very helpful, and we've had a number of responses from our readers about that one.

**Yes—as you should, because if you are wise enough to share the knowledge, then hopefully, the replies would also be uplifting for you (yes). There are many who would wish to join you in this work, and I know always that you are happy to make them welcome.**

George: Yes, they are always welcome (**yes**).

**I of course, if I bring someone to you specifically, I will always inform you (thank you). I do not wish to remain with you too long this time. I just felt that some clarification was needed about this—because you are giving me credit where none was due.**

*Chuckles*

**So I say to you, my dear friends, accept those people who come to you with love, and they will continue to want to join you on many occasions. In the same way, it has given me much reason to join with you, time after time. I wish, at this present time, to again work with this instrument that I use. I am also working, and she will not know this, but I am also working with her in her healing state, and hopefully, to work through trance (wonderful!), but as I have said, *she* does not know this yet.**

Lilian: But she will, with this transcript—

**But she will in time to come.**

Sarah: She had a reading from somebody a while back, and he told her that she hadn't chosen to do this work—she had *been chosen* to do it. **Well, I can only say that *yes* she was chosen by those of us in spirit, and *I* in particular, for *us* really I should say, to be a channel—as are all of those people who are used in any kind of trance—yes. But of course, they still have to be willing to give of their bodies for a short time (yes). I know—I don't know—perhaps if she has said to you, but to begin with she was most reluctant.**

Lilian: Yes, she has mentioned it.

**But, as you know, we take care of those who work with us—as all of you within this group, must have felt at certain times, that we try our utmost to uplift and protect you.**

*Affirmations*

**Yes—so now, for this time, I will work quietly with this instrument, and I will leave you to see what comes for the rest of your evening.**

Sarah: Could I Salumet just share something with you—I think mum was very much searching for things in this lifetime, and I came across a note she had written. She had obviously copied it from somewhere. And I thought it was a very nice summary of things you've said to us concerning: nothing is ever by chance ... *'Nothing in our lives is haphazard. Every event dovetails with another. After one experience, another is born.'*

And I just thought that was a very nice way of—

**Yes—those are wise words, yes. They would have come from someone who was aware—aware of the spiritual life (yes)—as you all have become—and hopefully continue to grow.**

George: Are you Salumet, able to take a brief question from one of our readers?

**If it is very brief, I will.**

*The lady had previously sent in a question concerning a daughter. She was most grateful for Salumet's words, and now asked for advice regarding a second daughter, now 16-years—glandular fever for two years and still recovering. And being fearful of a presence was now seriously affecting her sleep at night:*

**Yes—all I will say about this is that this young woman is of course of an age when these things happen to come to the fore (yes). Yes, and of course the fear that she radiates is not helping. I will see what I can do to find help for her. And perhaps the lady will be kind enough to keep us informed. But I will see what can be done.**

George: Yes, well thank you very much, and she was most grateful for your previous answer regarding her other daughter (**yes**)—thank you.

**And now, I really must work with this one.**

*General thanks and farewells*

-----

Sarah, sensing one might be with Paul: Good evening—welcome to you.

*A lengthy pause followed*

Sarah: Good evening Bonniol—I *thought* you were coming this evening. Nice to have you back! ***I've been having problems linking, but we seem to be able to speak again.***

Sarah: Jolly good. I think the link was nearly there, because I kept feeling that you were coming—it was only a little connection that wasn't quite right I think—

***Yes, it's not always clear, even for us, what the problem is sometimes, but once we've come through, we are through! But until we make that***

***final—almost like a push through—then it can be difficult.***

Sarah: Yes, anyway you've done it—that's the main thing. Jolly good!

***Thank you. Um, yes it's always lovely to re-connect with you people.***

*I crossed over from the other side of the room to catch up on this initially quiet conversation (it was important not to disturb Salumet's working with Eileen)—*

George: It's wonderful to have you through again, Bonniol.

***I've been thinking of you, even though we don't always speak. I think it's good to have these thoughts because—it's becoming a smaller place, isn't it!—this universe.***

Sarah: Yes, it certainly is, yes. Have you had any exciting things happen on Planet Aerah recently? ***Well, there are seasonal changes, which we enjoy! —the way the seasons change. We, as you know, are perhaps closer to nature in some ways—with our work and our lifestyle in general. We like to be close to nature, when we can.***

George: Yes, I think this is perhaps one of our faults in modern times on this planet. We've moved a little away from that; and I would like to see everyone going back to a simpler life, much more involved with nature than we are at the moment.

Sarah: There is a bit of change beginning to happen. There are people with allotments to grow their own vegetables. I think it is beginning to change a little bit. These things take time, when you've moved so far away from it.

George: Yes, there is home-gardening and organic agriculture; this is beginning to come in. We use far too much mechanisation and chemicals in our farming. I feel it will be much nicer if we can do things on a smaller scale, so that more people are involved in that work.

***Yes, it's um—it's so nice to share nature with others. It's the sharing (that) I really feel is something that is key to so much in life. We are***

***all individuals, and yet, when we share our thoughts and feelings, there is a new awareness that begins. And in nature, we can share this—these feelings.***

George: That's a very nice thought. I think we are beginning to realise how fundamental to everything 'thought' is. It's much more than prayer and speaking and thinking about others, and connecting and speaking across the universe, as we are now. 'Thought' is so fundamental and opens so many possibilities. I think we're just beginning to realise this.

***Well, it's not for me to say more than—I think we have already spoken of this (yes) incredible thing we have called THOUGHT—there are—even for us, who work with it in ways which you are not yet able to do—we still wonder at the potential there is. It is truly the most important thing in Creation—from what we know.***

George: It's nice to hear those words. Perhaps, connected with that—we are only really just beginning to realise what the large pyramids mean, on our planet. We are beginning to realise now, that when other visitors have been here, the first thing they have done is to build a pyramid—to capture or create the energy for their wellbeing while they're here and to provide power for their return journey. I don't know how widespread in the universe pyramid-building is, but it seems to have been a favourite thing to construct pyramids in the past on our planet Earth.

***Yes, it is um, certainly not something that is unique to Earth. We also have pyramids on our planet, which are also used to gather the energy.***

George: Well, that's interesting.

***We have um, developed um—there is um—we have um—these—***

*Pause—there can occasionally be a little difficulty with word flow*

***The shape of the pyramid is of course um, a perfect shape for collecting and steering or pointing this particular energy in the direction***

***(yes) and when we are sitting inside the pyramids—it can be of great help to use this to focus.***

George: Yes, would you describe this as an aid to help meditation?

***The meditation um, comes from within the person I would say (yes) but the pyramid shape helps to build the power that is generated.***

Sarah: I was wondering how you built your pyramids, because you are able to use your thought much better than us. Our pyramids are made up of big blocks. Are yours similarly made or can you use much larger—

***Yes, the rocks of the earth, we find are the best for—um—capturing if you like, the energy—um—the shape itself is important.***

George: Yes, and it must be aligned to planetary spin; and I would think the energy arises from sweeping through the aether in accord with the planetary spin.

***Yes—the position has to be at the right angles for intercepting the flow of energy that is being collected.***

George: Yes, I imagine the energy within the pyramid adds to mind energy, or helps in some way, when meditating.

***The mind is not helped as such. I would say: there is power to be used, and it is put to use for whatever purpose.***

George: I see—thank you.

***There are ways to use it but it is an energy not of ourselves.***

George: No, we realise that it assists various things, and we know that if we store seeds within the pyramid energy they produce more in the way of crops.

***Yes, they have been used to help with the storing and protection of seeds.***

George: Do you use pyramid-storage to assist your agriculture on your planet?

***We have experimented with this. We find we do not actually need to use them in that way (I see) and store what we need for—the seed can be stored in other ways but the pyramids can be***

***used to improve areas which—um—which have conditions which cause problems for plants.***

George: Of course, the area around, surrounding pyramids is influenced by the energy, I believe.

***Yes, and if they are located in the right places, this can improve the fertility, if you like, of the area*** (yes).

Lilian: So, do you build them just to help a particular area?

***I would say that is our main interest. We are people who spend a great deal of time working with nature; and where pyramids are used it is usually with—um—in connection to improving the nature in some way—whether it's for our crops—***

Pause

George: Yes, I was going to say, is there some influence on wildlife?

***There is always interaction—when you build pyramids, they have an effect on the area.***

Lilian: Yes, so when you visit other planets or they visit you—do lots of other planets have these pyramids?

***Yes, they are a shape—a structure which has a definite affect on the energy flows, and so they can be of use for that.***

Rod: Are the dimensions of the base and the height of the pyramid a common feature throughout the universe? Are ours similar to your sizes?

***I would say the size is not as important*** (no?). ***It's the positioning and what they are built with.***

George: I think the proportions—height in relation to base, vary considerably. But I think you are saying that the position is more important than the precise proportions—

***They should be positioned precisely. The size of them varies, depending on the nature of the area and the requirements of the area.***

Lilian: So would it be that energy-lines are used—to put them on?

***Yes, they are used, always with the energy lines, yes.***

Mark: Are they used for healing and purification?

***They can certainly be used for healing, yes. Yes, and—um, when you say purification—um—***

Mark: I understood that you can purify water, and even give it healing quality—I don't know if that's true?

***I would say in the sense that the water would be energised, it would be—um—improved in that way*** (yes).

George: Yes, and we've noticed that there's a very big effect on water. Normally our water freezes to solid ice at low temperatures, but it doesn't inside a pyramid. So the energy that is taken up by the water seems to prevent it from freezing solid.

***Yes, I would imagine that is due to the greater energy in the water.***

George: The bonding between the atoms of the water just doesn't seem to happen, when the energy is there.

*At this point, Salumet had completed his work with Eileen, so she was now herself and able to participate in the discussion*

Eileen: Could I say: where you are so much more advanced than we are on Earth, is it still necessary to use pyramids to change energy? Have you not reached that stage yet? Can you not transmute energy with your mind, without the use of pyramids?

***There is—um—we have abilities to transmute energy, yes. The pyramids are permanent features, which require no additional thought or attention. So, in areas where we may wish for nature to create—um—a different energy situation; where plants and nature can begin to grow and benefit from more constant environment—***

George: So we can think of a pyramid as an ongoing, permanent energy trans-muter that doesn't have to be fed or up-kept in any way.

***Yes, we could of course still grow our crops but we feel they are a natural—um—tool to use, much like other tools for growing crops. They can be placed and—***

George: Do they alter your climate at all? Do they have any effect on climate?

**Yes, they affect the area around them, and yes, they will have an influence on the climate.**

*At this point, another began speaking with quite a throaty voice via Jan, from across the room:*

***They are regulators! They act as regulators!***

**Yes, they can—um**

***You don't have the weather that you are experiencing at the moment—it is much more regulated, because of the energy that it transmutes.***

George: Might I ask Jan: are you picking up from Bonniol's group at the moment?

Lilian: I think it's from spirit.

**Yes—so they—**

***May I help you sir?***

**Yes please.**

***You are struggling with language are you not?***

***It is sometimes difficult.***

***Of course it is! We understand entirely. You are doing magnificently well!***

*Pause*

***The older the base of the pyramid that you speak of, it will hold the greater amount of energy.***

George: So the bigger the base, the greater the amount of energy—

***The OLDER the base of the pyramid (the older!)—the greater the amount of energy, that will be released from the top.***

Lilian: So it increases with the age of the pyramid—

Mark: So they use older materials for the base—***Older rocks—yes.***

George: Is it that the energy builds up over time?

***Yes, the older the pyramid—we are using the word 'pyramid' aren't we? So we all understand exactly what we are talking of. The OLDER the pyramid, the greater is the energy released. So hence, when they are growing their crops, the older energies are the ones that regenerate quicker, better—so their crops are grown nearer to those energies. And the younger crop does***

***not need it quite so much. Do you understand? Do you understand what I am saying at all?***

George: So the longer the pyramid has been there, the better will be the crops.

***Yes! (Ah) So the older the pyramid base—that's what holds the energy of that plant completely. That's the origin of that plant and foodstuff. Do you understand? That's the energy that that plant came from.***

George: Yes, that's very interesting.

***As the seedlings — as they reproduce these things, of course, they don't need so much energy, because their life force always belongs to that OLDER pyramid.***

George: Yes, that's interesting.

***I know it's difficult to understand because you can't see exactly what I can see.***

George: It's very interesting to us. Might I ask: who it is who's speaking?

***I don't want to give a name thank you. It is not necessary.***

George: Not necessary—

***No, I couldn't think of one!***

*Chuckle*

George: I just wanted to know if you are connected with Bonniol and Planet Aerah.

***I'm just helping. Let's just put it that way. I'm not connected to the planet.***

George: You're helping from spirit (**yes**). Thank you.

***I'm just helping with the language and to be able to give you a little bit of a picture.***

George: Yes, I understand—it's very helpful.

Mark: So those older rocks that they use for the base of the pyramid—

George: (*turning to Bonniol*): So you are getting some spiritual assistance, Bonniol—(*no reply*)

Mark: So it's a higher concentration—

***I'm sorry—I'm listening to both conversations.***

***I'm sorry—I need to listen to this gentleman first (Mark)—do you mind? Please carry on.***

George: Please continue.

Mark: So if I understand correctly, the older rocks which are used for the base of the pyramid (**yes**)

will have a higher concentration of energy (**yes**) which is utilised by the plant (**yes**) for their initial (**yes**) growth.

**Correct—you have it.**

**Mark:** Because there's some kind of—(**mother energy**) *mother energy* right, it's an old *mother energy* involved (**yes**). So I suppose the rocks were made up of that originally (**yes**) and it's been re-absorbed (**yes**) by the new growth.

**Eileen:** So as you reach the top of the pyramid, is the energy much more refined?

*Pause*

Refined in the same way as when we go to spirit?

**'Refined' is quite a good word for it. I was trying**

**to find a better word. In actual fact I think**

**'refined' is quite good. As the energy rises**

**above, to the pinnacle of the pyramid—where**

**you are using the word 'refined', I would use the**

**word 'resourceful'; because that energy is able**

**to travel in such a way that it is all-**

**encompassing (mm)—it goes to where it is**

**needed. At the bottom, is the oldest and the**

**most dense. As it travels upward, it knows**

**exactly where to go—it's resourceful (that's**

**interesting). It becomes a lighter vibration, so it's**

**able to travel (yes) exactly where it's needed.**

**Mark:** So would people use that for healing?

**Absolutely, it's used for everything.**

**Mark:** So how do people harness the healing

energy, for illnesses and things?

**Thought.**

**Mark:** With thought, right.

**Has that been of any use to you? (Yes.) I would**

**like to go back to the gentleman. Do you have**

**any more questions? I am sorry, I have taken up**

**too much of your time.**

**George:** It's all interesting. Yes, and thank you

very much. So—

**I want to withdraw now.**

**George:** I'm feeling that the energy is self-

thinking in a way and self-organizing, in going to where it's needed.

**It's resourceful—you understand the word resourceful, do you not?**

**George:** I understand the word 'resourceful', but does *thinking* come into it?

**Yes, like this gentleman has just confirmed, healing is done by pure thought.**

**George:** Healing is done—yes.

**I want to leave—I want to depart. I'm sorry—if you will allow.**

**George:** Nice to have met you. Thank you very much for coming through. It was most helpful.

**Lilian:** Are you still there Bonniol?

*I—*

**George:** Ah, you're still with us.

**I've been having a little break!**

*Chuckles*

**It is most welcomed, to have someone more familiar with the words to help explain.**

**George:** Regarding the assistance from spirit, I thought at first it might be from your team—then I realised and understood from the one who came through, that it was coming through from spirit.

**Yes, that is absolutely right. My team are with me in a sense, as I speak (yes). I speak with the team very much in the background.**

**George:** Yes. On certain previous occasions, I know that Jan, over there, was picking up from your team. That's why I thought it might have been like that in this instance. That was wrong-thinking on my part. I understand now.

**It is easy to be confused, I would imagine.**

**George:** But it's a wonderful evening for us, to have all this input.

**But you have so much in this group. I have been around long enough now to know the wonderful evenings that you have.**

**Jan:** Bonniol—did that gentleman explain what it was you were trying to get across? I think I was asleep before he came, so I missed a bit.

**I think there was some information about how the plants grow around the pyramid base—I—**

**George:** And how the older the pyramid, the more effective it is.

**Jan:** Clairvoyantly, while I've been sleepy, I've had a picture of many pyramids of different sizes, and

very definite straight lines of them. The larger plant material seemed to be growing nearer the larger one, which I presume was the older one that he was talking about, and the saplings seemed to grow towards the smaller of the pyramids.

*At this point the connection with Bonniol was no longer there and as it had been a long session, the evening gradually came to a close as we discussed and tried to digest this new material.*

---

While preparing this transcript I received the communication below from Suzanne Taylor. TED (Technology, Entertainment & Design) is a global conference system, for 'Ideas Worth Spreading'. It is the parent organisation of TEDx – for independently organised events. But it seems that TED endeavours to shut down the TEDx event! So much for independence! And the TEDx speaker list is impressive: Marianne Williamson (Love restores reason; not the other way around), Russell Targ, Larry Dossey, George McGraw etc. **And needless to say, the work that Salumet, Bonniol and the Kingsclere Group do would likely not be welcomed!**

This story is breaking today online: <http://weilerspsiblog.wordpress.com/2013/03/30/ted-not-satisfied-with-current-censorship-tedxwesthollywood-is-taken-down>. It's bigger than TED, going into the societal resistance to what is beyond empirical science, where the evolution of humanity must go. It's a focal point for dialogue and the comments are unusually intelligent.

WE WILL DO OUR EVENT WITHOUT TED, AND IT WILL BE LIVE STREAMED, Sunday, April 14, 9:30 to 7:00 pdt: <https://new.livestream.com/extedxwesthollywood>. Please spread the word.

To stay up on developments, get on the mailing list for [TEDxWestHollywood.com](http://TEDxWestHollywood.com) and *Brother, Can You Spare a Paradigm?*: <http://eepuri.com/xr1Fz>.

To the future we would like to be in...

*Suzanne*

Events and projects that can shift our awareness  
Ex TEDxWestHollywood Event Coordinator

I left the following message on Suzanne's blog site:

This is all getting very wordy, but at the same time it is symptomatic of outmoded traditional science now finding itself in the melting pot ... and in a strange way, this is refreshing. The huge leap forward for humankind, as sentient beings will happen when we SERIOUSLY work into the vast potential that awaits us beyond space-time. We might call the development 'spiritual science' for want of a better name. As a result of working in this field, our UK group of scientists and spirit mediums (considered unacceptable by learned institutions and media of course!) have made enormous progress. We communicate with other planets of this universe, we understand how and WHY our original pyramids were built (by ETs using THEIR spiritual science methods, some pyramids now radio-carbon dated to >30,000 years) and we have communicated with scientists long since dead! This is all very unacceptable to traditional scientists, but that old cookie now crumbles. Details on 'Scientific Enquiry' page of our website <http://www.salumetandfriends.org>.
