

THEORY OF EVERYTHING

THINKING THINGS THROUGH: THOUGHT is all-powerful—the guiding factor that underpins evolution. Therefore it is of prime importance that we THINK OUR WAY THROUGH chaotic times. Currently, our way forward falters, our science falters, our financial houses falter and our oneness ideal is under threat from warring, plunder of resources and from both institutional as well as individual self-aggrandisement. Where ETs are concerned, we often speak of ‘us’ and ‘them’. This has to change! We are a part of one big family that shares multiple universes. So we Earthlings need to get with it and recognize precisely this. Earth is just one speck within the grand design and the problems inflicting our planet indicate that it is a time for WAKE UP CALL.

QUANTUM THEORY: Newtonian physics has been a comfortable and accurate way of seeing the hardware of space-time—a part of our growing up. That other, non-material part of this universe has been ignored, to the extent that for much of the 20th century it was regarded as empty space—nothing. I was once ticked off by a university lecturer for daring to think otherwise. He was wrong. That non-material part has been given so many different names over the years—from Aether to Higg’s Field—it is the creative fount of all that we see as material and much, much more. Quantum theory seeks beyond Newton’s physics and has helped us to think a little further. BUT we must not forget it is only a theory—that is *all* it is. I know there has been a tendency to consider it as reality. Perhaps it should be seen as a pathway-of-thought that leads us away from the obvious hardware of existence, and the quanta may well be, not little bricks, but energy focal points. So what next?

NEW PARADIGM: It is time for a new paradigm in science. There has not yet been full recovery in science from the erroneous ‘nothing’ view of the space between stars. Despite many proofs and publications, noble works by individuals and small groups—the realities of spirit, spirit communication, extraterrestrial communication, telepathy, synchronistic events, teaching from Angelic Realms, visions witnessed by huge crowds and the proven value of prayer—these are all essentially shunned by institutional and well-funded science. This is a stumbling block to our scientific progress and has to change. And this is the essential difference between the science of Planet Earth and the science of those ET visitors who over the years have been seen to have mastered space-travel, crop circle formation and pyramid construction. We have in the past and for several reasons been reluctant to change our ways. And sadly, governments, institutions and news media have treated ETs and their achievements on our planet and in our skies as a taboo zone.

AETHER WAVES: It is scientifically accepted that sound waves are compression waves that travel in air at fixed speed and exert a pressure on the surface they strike. Sound is a physical wave generated from a vibrating source in a physical world. It is logical (and against conventional scientific thinking) to suppose that ‘light’, on a much finer scale, is a similarly generated compression wave that travels in the aether medium. Like sound, it travels at fixed

speed and exerts a measurable pressure on striking a surface—so it has some physical character; but there is the difference that light can also travel the universal continuum to reach us from our sun and from distant galaxies. But what gives it that trace of physical character?—compression is the answer. [I know James Clerk Maxwell has described light in electromagnetic terms—electric and magnetic vectors will be the effects of movement within the waveform—also a part of its character.] As a scientist, I still think of the aether as a continuum. The spiritual sources that I know, prefer to regard it as energy. Whether seen as energy or continuum it will play an enormous part in our developing awareness. It was early 20th century (1913) when the Rev. G Vale Owen channelled the advanced spirit Zabdiel: *'If you were to endeavour to build up a machine for the manufacture of aether and the conversion of it into matter, you would find no substance to your hand on earth of sufficient sublimity to hold the aether, which is of a force greater and more terrific than any force which is imprisoned within what you understand as matter.'*

Rev. G Vale Owen / Zabdiel, *The Highlands of Heaven*, The Greater World Christian Spiritualist Association

So this spiritual source of 100 years ago acknowledges the principles of aether→matter conversion and of aether as a very powerful energy. Our nuclear bombs have worked backwards to convert matter into a vast amount of energy but in-keeping with the statement of Zabdiel, we have of course no way of reversing that to a process of creation. Einstein's equation $E = mc^2$ is a scientific statement of Zabdiel's described conversion but we have only succeeded in using his equation backwards.

TORSION WAVES: Torsion waves are twisting waves in the aether that have no compression. These waves therefore exhibit no physical character and are not governed by the laws of either space-time or physical science. They require no travel time, do not exert pressure and do not arise from physical vibrating source. These non-physical waves relate to prayer, telepathy and ET-communication. Such communications are instantaneous. There is ample clear evidence for the instantaneity of ET-communication and telepathy★ but such evidence is at present shunned by our science and its institutions.

CONCLUSION: The way forward is plain to see. Science, universities and institutions must break out from the shell of 20th century attitudes and take on board 'spiritual science'. Governments and news media must exhibit more openness and keep up with astounding new developments, such as the Bosnian pyramids, ET-communications and other revelations that shatter yesterday's status quo. And think things through—we must never underestimate the power of thought. This applies to both science as well as our social failings. Thought, enhanced through meditation, precedes evolution.
