

INFORMATION: MANY SOURCES ARE NOW AVAILABLE TO US IN THIS 21st-CENTURY

Information comes to us from far and wide, some sources are obvious and some less so—some ring true while some are clearly biased, politically motivated or even censored. But, of course we have freedom of choice—if two reports contradict, then of course only one of them will be correct—if we're lucky! Today's news sources are:

- | | |
|----------------------------------|--|
| 1: <u>National Press</u> | Tabloid newspapers, journals ... with daily / weekly / monthly updating. |
| 2: <u>TV</u> | News channels that give either primarily domestic or a broader world coverage of events. |
| 3: <u>Book Publications</u> | These include 'in depth' examinations / explorations by individuals who have duly studied. |
| 4: <u>Output of Institutions</u> | Books / papers / journals / research by universities and learned societies. |
| 5: <u>Internet</u> | Websites, Google search, emails, blog sites etc. Our website: www.salumetandfriends.org |
| 6: <u>Séance Groups</u> | Spirit communication from variously advanced levels in spirit domain including Angelic Realms, accounted in 5. |
| 7: <u>Prophetic Visions</u> | Some witnessed by huge crowds (Fatima 1917), fully accounted in 3 and 5. |
| 8: <u>Extraterrestrial</u> | Direct speech communication specially arranged via 6; indirect via past life accounts (6) and crop circles (3 and 5). |
| 9: <u>Personal Guidance</u> | All of us have the 'knowing within' that we can tune into in quiet time. We just 'know' if we go sufficiently within. |

The traditional news / information sources, 1 – 4 in the list, have been in place for a long time. The world is rapidly taking on board 5, which has a much wider range of information, offered without hindrance of bias, censorship or adherence to traditional concepts. Freedom of the still growing Internet, as an information source, paves the way to a much wider realisation of the enormous value to humanity of the information sources 6 – 8. Item 9 is of course known to us all if we reflect upon it, and it is one prime teaching that comes to us in 6 from Angelic Realms.

It is evident that our civilization has now entered a phase in which much important data is to be found fully reported on the Internet, that is virtually ignored by the older time-honoured traditional sources. Some will opt to remain traditional—understandably so. But nevertheless, in UK there is still the choice of domestic news (e.g. BBC, ITV, Sky) or a broader world coverage (e.g. RT, Al Jazeera) channels. But rapidly increasing numbers are going to the Internet because of its all-encompassing coverage, rapid accessibility and absence of political posturing and censorship. And it is clear from the above list that traditional news sources fall very short on reporting anything extraterrestrial except for institution-credited astronomy. Even the hugely important and radio-carbon dated Bosnian pyramid excavations go unreported by 1, 2 and 4. The evidence is that these pyramids, as many others of our knowledge, were built by friendly extraterrestrials.
